

In only a half year at Elevate my child's reading level has gone up by 2 grades. It's a huge relief knowing that he is finally in the right place to help him learn and encourage his social and emotional well-being at the same time.

## WHO WE ARE

ELEVATE is a unique private school for elementary students with diverse learning needs. At ELEVATE, we believe that all students can thrive and succeed when they are supported in the right way. Our learning program was created to specifically support the unique needs of students with learning disabilities, ADHD, Type 1 ASD, and other exceptionalities in a way that builds their self-esteem and creates motivation for learning. Your student does not have to have an official diagnosis to join ELEVATE.

## WHY ELEVATE

ELEVATE is designed to provide intensive remediation to lessen the gaps in learning that may have been preventing students from doing well at school in a structured environment where compassionate educators comprehend and embrace their distinct requirements, students can socialize and bond with classmates who share comparable learning challenges, forming meaningful relationships. The program's staff comprises a diverse mix of trained professionals, including Special Educators, Ontario Certified Teachers, Early Childhood Educators, Educational Assistants, Child and Youth Care workers. We use evidence-based practices including the Orton Gillingham approach of structured literacy to meet our student's needs, help them make gains in the areas in which they struggle, and empower them to feel confident and excited about their learning again.

- Direct Instruction
- Low Student-to-Staff Ratio
- Registered Non-Profit Organization

## ELEVATE'S FULL DAY PROGRAM

Our school hours are from 9:30am to 3:30pm.

ELEVATE's unique program focuses on literacy, numeracy, executive functioning, and social emotional skills for our learners. We teach social studies / science and focus on other subjects including art, keyboarding skills and physical activity during our daily Flex Block time.

Our classroom is designed specifically to help all students learn strategies to self-regulate independently. This might mean a quick jump on the indoor trampoline, sitting on a wobble chair, bouncing their feet up and down on the bouncy band on their chair.

At ELEVATE, we also recognize that not all learning takes place in the classroom. We connect fully with our community through our monthly volunteer work at Food For Life, biweekly visits to the local library as well as a variety of field trips.

## WHAT PARENTS SAY

The staff are caring, knowledgeable and well trained in learning diversity. The program is tailored to the needs of your child emotionally and their specific learning style. The education is shaped to a grade level appropriate to them (whether that be below, at, or above their age grade). My child has only been there 6 months and has made great progress which we hope to build upon, thanks to Elevate their programming and caring team."

I am thrilled with the opportunity that Elevate has provided to my child. We have seen great improvement in numeracy, literacy, and confidence. The teachers are warm, caring and dedicated. I highly recommend this program. It's truly a gift!"

The Elevate program focuses on the individual needs of the student and help set them up for success with one-on-one attention, social skills education and strategies for learning they will take with them to use throughout their school experience. It is not a one-size-fits-all world, and this is finally a program that not only recognizes that, but actually fits the curriculum to the individual as well as taking into account how they learn. No child is left behind here."
